

Harness the power of your IP PBX with newVoice Native SIP

Your business depends on being able to communicate with customers, suppliers and employees. You made the investment in an IP (VOIP) PBX for your business—are you getting the most out of it?

Save Money, Add Redundancy, Increase Functionality

NHC's newVoice Native SIP uses SIP (Session Initiation Protocol) to route calls over your existing or NHC provided Internet connection(s). Choosing the right communications provider for Native SIP service is critical.

Benefits of newVoice Native SIP

✓ Highest Quality and Performance

Our newVoice Native SIP rides on top tier networks. Call quality and connection speed is the best in our industry.

✓ Reliability from the Cloud

Power failure? Weather event? Internet Connection Down? NHC offers a variety of DR solutions to insure that your customers can reach you.

✓ Save Money

We offer low cost usage plans based on call volume that can be pooled across all locations. Contact us for a quote.

✓ No Portability Issues

Keep your phone numbers no matter where you move. Establish a "local" presence without the need for a physical office.

✓ Feature Rich

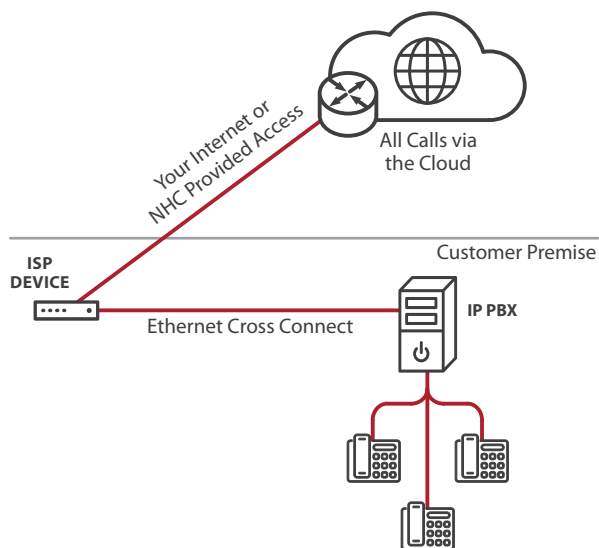

Able to support any number of simultaneous calls—the only limitation is your phone switch's capacity and Internet access.

- Add and delete voice channels with ease
- Direct Trunk Overflow—forward whole trunk overflowing traffic to a single telephone number
- Detailed calling data including incoming caller location, duration and much more

newVoice Native SIP:

- ☎ Compatible with all leading manufacturers of Native SIP PBXs
- ☎ Priced and configured by the SIP Voice Channel that accommodates one inbound or outbound call
- ☎ Can be used with NHC-provided access or your existing broadband bandwidth

We Take Care of All The Details

You will be assigned to work with one of our experienced Project Managers. The PM will work with you and your phone vendor through our 7 step implementation process.
