How The Communications Stack Builds a Secure, Comprehensive Network – Layer By Layer
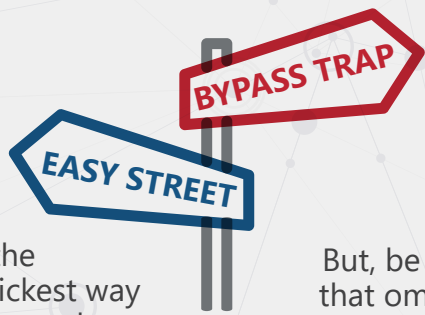

If your customers struggle with network outages, outdated technology, and overworked IT professionals, set them on the **path** to success with the Communications Stack.

BYPASS TRAP

EASY STREET

Our partners know that the Communications Stack is the quickest way to **Easy Street** – delivering the complete network solution.
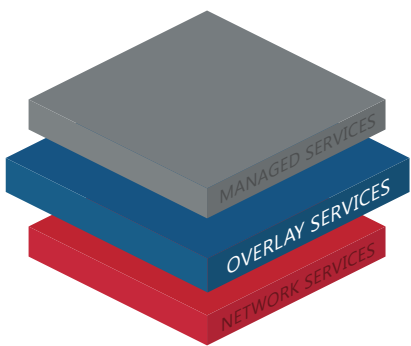

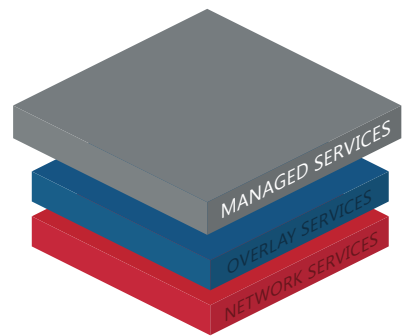

But, be sure to avoid the **bypass trap** that omits one of the layers and limits your customers' network protection and capabilities.

You too can follow the same **roadmap** for successful customers:

EASY STREET

Top Layer – Managed Services

Our managed services ensure:

- Ongoing network monitoring and protection for your customers with cost savings and scalability
- Reduced technical workload for your customers' IT professionals
- More attention and support for your customers

NETWORK SERVICES

## Middle Layer – Overlay Services

Our managed services ensure:

- The latest and greatest cloud-based collaboration tools
- Increased communication capabilities
- Empowered employees and growth opportunities

Access Layer – Network Services

Our network services ensure:

- Fast, scalable connectivity anytime, anywhere
- Dedicated public or private network
- Advanced technology applications
