nvConnector Installation for Admins

Version 1.0 August 19, 2022

Revision History:

Revision	Date	Description of changes	Requested By
1	8/8/22	Initial release	JN
2	5/23/23	Updated page 7 to add new grant permissions.	JN

Solution Overview

- nvTeams Connector lets you use the native dial pad in Microsoft Teams as an end-point or softphone via user's extension.
- Desk phones are registered NHC devices
- Teams desktop and mobile app are registered to Microsoft Cloud and then to NHC via the nvTeams Connector
- •
- A Teams user to user call (not leveraging the dial pad) does not leave the Microsoft Teams cloud. For PSTN or UCaaS handset calling, the dial pad must be used.
- Call flow and feature enhancement are controlled by the

NHC Softswitch . The nvTeams Connector allows the ability to make and receive calls from the Microsoft Teams dial pad.

- Inbound PSTN calls will ring all registered devices
- Outbound calls can be made from any registered endpoint

nvConnector installation steps.

Step one of integrating your nhc. New Voice phone system into Teams is to make sure your Office Admin has the correct licenses added to user. You must have the following recommended licenses to use the nvConnector.

The recommended O365 license is Microsoft 365 Business Basic

The recommended license to add for voice is Microsoft Teams Phone Standard

If Conference calling is desired (the ability to call in to a Teams meeting using an access number) you will need the following license

M365 Audio Conferencing

https://admin.microsoft.com/adminportal/home?#/licenses

Go to Users -> Active users

Click on username

	Microsoft 365 admin center			E .	(N) ?
≡		Turn this on in Azure AD			С×

Þ	Setup		Save changes		

Add license by checking box next to name

Save changes.

There must be one free license unassigned license Office 365 and on free Teams Phone Standard to set up connector. It can be reclaimed after setting up.

Once verified you have licenses assigned you can contact nhc. To begin the build out of the nvConnector.

Once the build out of Customer Enterprise is built by NHC we will need approval and assistance from the O365 Admin to proceed to the next step. You will get an email from NHC that looks like the email below.

Email Text looks like this

There are a few steps to finalize your setup on the nvConnector Connector.

- Use the link below to login to nvConnector's Enterprise Provisioning Portal using your Microsoft Office 365 Global Administrator credentials. These credentials must be associated with a licensed (E1, E3, E5, Microsoft Business Voice) Microsoft Office user.
- Navigate to the 'Direct Routing Management' menu.
- Select a valid Domain Name in your Office 365 Tenant/Organization and input the Invitation Code included below.
- Next add in your PBX Settings and upload User information as instructed.

Invitation Code: **P0t7Jh11qj**

We will do our best to keep you informed during the provisioning process. Some processes are asynchronous -Microsoft takes time to propagate new Office settings. On these you will receive email notifications when things are ready.

You must use the COMPLETE button below to initiate use of the nvConnector Connector

Complete Registration

Thank you, nvConnector

To proceed hit the green Complete Reg Button This will take you to nvConnector to complete acceptance of the nvConnector portions of build into the Office environment and set up the direct routing portion that will be required to proceed.

You can also use this link.

https://enterprisenvt.connecttoteams.com/

You must grant Permissions for nvConnector.

oe@nhcgrp.net

Please Press Sync Additional Voice Routes to set up back up voice route. Wait till green success banner is displayed. (This process could take 10 minutes)

This ends the Office Admin portion of the nvConnector build.

*You must have either an additional O365 and Teams calling license or unassign the original free licenses. Please see section below to unassign licenses.

Office Admin will then get this email

Direct Routing Configuration Status

Dear nvConnector Enterprise Administrator,

Your wait is over! Microsoft has activated your Direct Routing connection into Teams. nvConnector has received word back from Microsoft that the components in the SIP Trunk integration are setup and functional.

Teams SIP Domain:

Please use the link below to log into the nvConnector Portal so that you can add Users to this connection.

Login

Thank you, nvConnector

Office Admin does not need to build out users. Please contact NHC and we will take care of this portion. Office Admin will need to inform us that they received the email so we can begin our part of the build. We will then build out the users and the newVoice lines.

We will contact you when we have completed this portion of the build. You may receive emails like the one below during this process. Please wait until NHC notifies you that the build is complete before taking the next step.

Once the lines are built you should receive the following email.

Dear nvConnector Enterprise Admin,

We have observed that your Reseller New Horizon Communications made changes to settings that require Synchronization with Microsoft AD.

Please click on the following link to login and Sync from the dashboard action items.

Login

Thank you, NHC

Please click the Login in Button to Sync nvConnector and Teams or use this link

https://enterprisenvt.connecttoteams.com/

Adding nvConnector App Support for CommPortal. (optional)

If you are looking for an easy was to integrate NHC Commportal functionality (give your PC access to such great features like find me follow me, PC Voicemail access, and so much more!) look no further than the nvT for Teams app. If you would like to deploy this app please contact NHC.

Once you have contacted NHC we will build you the app. Once it is built we will need the Office Admin to log in to the following link to Sync the PBX app.

https://enterprisenvt.connecttoteams.com/

NN MENU	Enterprise Admin Action Items						Custom Teams Application

You will need your Office Admin credentials to access.

Under Enterprise Admin Action Items.

Press the Sync PBX App.

*Due to the script that nvConnector uses you will need to access this web page with the Chrome browser to compete this function. This will not work on the Edge or Firefox Browser.

Once the Sync is complete this app will be available in Teams. Search for nvt.

A guide is available for the app installation.

Reclaiming Office Licenses (If desired)
