Why choose NHC STACKfi?

Wireless connectivity is an essential and mission-critical communication gateway to your clients' business. Today's consumers demand reliable and seamless internet, allowing them to reach your clients wherever they may be while on the go.

NHC's STACKfi Managed WiFi enables your clients to have fast, open WiFi access – along with the protections and privacy they need to run their businesses securely and efficiently.

STACKfi Managed WiFi includes comprehensive:

- Design
- Configuration
- Installation
- Ongoing management

Our fully-managed service frees your clients from the burden and cost of setting up and managing a wireless network, allowing them to focus on satisfying their customers and growing their businesses.

With STACKfi, your clients get:

- Complete end-to-end WiFi service remotely managed 24/7
- Reliable access points that ensure full coverage and connectivity
- Ongoing maintenance including up-to-date firmware and patches

Features and Benefits of Managed WiFi

✓ **Management** - Eliminate the need to employ and monitor on-premise, in-house support for the constant maintenance of the wireless networks.

✓ **Scalability** – Quickly add equipment to meet growth demands.

✓ **Productivity** – Remote access provides a rapid response that meets the demands of a modern workforce.

✓ **Reliability** – Customers benefit from 24/7/365 technical support.

✓ **Affordability** – Our end-to-end managed solution doesn't require additional installation, replacement hardware, or upgrade costs – offering a shift from capital expenditures to operational investments.

✓ **Private WiFi** – Restrict access to unauthorized users. Set up password-protected WiFi for your clients with their own network name and security levels. They can customize the splash page with their logo and usage information.

✓ **Guest WiFi** – Separate, secure WiFi network for your clients and their guests. They can customize the splash page with their logo and usage information.
