

Using Microsoft Teams? You should be using **nv Connector™** too!

Integration is king. Good news - our newVoice™ cloud-based voice network is built with that in mind.

Introducing **newVoice Connector™ (nvT)** for integration with Microsoft Teams .
Our newest and most forward-thinking integration yet!

With **nv Connector**, newVoice Customers can use their Microsoft Teams native dial-pad to make calls to/from the PSTN using their newVoice subscriber line. Our customer's can also leverage our **nvT** plugin app in their MS Teams interface to configure and manage their newVoice voicemail, including Speech-to-Text (STT).

All you need is a current Microsoft M365 subscription*. That's it. We take it from there! Integration, while critical, has never been so easy!

nv Connector is a technology add-on feature to our newVoice Standard Seat license, and because newVoice is cloud-based, you can add nvT at anytime! You can choose between three term options: **Month-to-Month**, **12 Months**, or **36 Months**. Oh, and it's cost? Super. Simple. Pricing as low as **\$3.95/mo**.

Interested? You should be. Microsoft Teams is amazing. We use it. You should too - and if you're using newVoice, you should be using **newVoice Connector™** for integration with Microsoft Teams.
